Univance Green Procurement Guidelines

1. Environmental Philosophy

Univance Corporation will comprehend environmental conservation as one of the most important issue of mankind, and will act considering with global environmental protection in various fields of corporate activities.

2. Environmental policies

Our group will pursue the environmental friendly manufacturing and harmonize the corporate activities and global environment in order to inherit the better environment to the future generations.

1. Follow rules, and carry out corporate activities which take the global environment into account.
2. Minimize usage of resources, energy and the like.
3. Identify environmental risks, and continuously prevent them.

3. Green purchasing

Our group will promote environmental conservation activities in the supply chain by keeping in mind purchase of products, parts, raw materials, subsidiary material and so on from our suppliers who consider environment.

4. Environmental management system

Our group will recommend to acquire the environmental management system ISO14001 or equivalent certificates of the environmental management system (such as KES, Eco Action 21, Eco Stage, Environmental management system standard) in order to promote green procurement.

5. Investigation over Substances of (Environmental) Concern

Our group will promote procurement activities that comply with regulations and requirements of countries, regions, industrial organizations, and customers related to substances of concern.

6. Policy of handling chemical substances

Our group will promote procurement activities that consider the safety handling of chemical substances.

7. Reduction of CO₂ emissions

Our group will promote procurement activities that lead reduction of CO₂ emissions.
